## **Notice of Public Community Meeting**

### **Under Sun Acres Green Energy – Plant 2**

***December 13, 2022 - 10:00 am***

As part of the Independent Electricity System Operator's (IESO's) Expedited Long Term Reliability Project Request for Proposal (E-LT1 RFP) to competitively procure year-round capacity from dispatchable resources, Under Sun Acres Green Energy is proposing to expand their existing 13.3 MW electricity production facility. The expansion will consist of one (1) additional natural gas fired combined heat and power engine with an electrical output of up to 3.3 MW. The engine will be located inside the existing facility and will achieve an efficiency of ~90% or greater with the utilization of heat recovery equipment, where the waste heat from the engine is recovered and utilized to heat Under Sun Acres' production greenhouse.

A public community meeting will be held to discuss project details on December 13, 2022 at 10:00 am. The meeting will be held virtually and the link to the meeting is available on the Project Website: [www.undersunacres.com/cogen-exp/](http://www.undersunacres.com/cogen-exp/)  
All interested parties are invited to attend.

#### **Meeting Agenda:**

- Introduction and background
- Project proponent, name of project, nameplate capacity and technology
- Description of proposed project as well as general details of existing plant
- Map showing boundaries of project site, location of Connection Point and Connection Line
- Details of selected combined heat and power engine
- Question and Answer Period
